

# Press Release

## **CCN sets the bar for Malaysia's cold chain logistics**

**Puchong, July 16, 2009** - Established in 2002, Cold Chain Network Sdn Bhd (CCN) is a Malaysian company that specializes in temperature-controlled warehousing and fleet logistics. As a subsidiary of the Malaysian Agrifood Corporation Berhad (MAFC), CCN is fully committed to maintaining unbroken cold chain integrity from farm-to-fork, ensuring that all food products are delivered fresh at all times. CCN's customers include the top retailers, manufacturers and food distributors in the country.

CCN claims the largest fleet of triple compartment reefer trucks. This fleet of trucks is amongst the very first in providing on-board temperature monitoring and on-spot data printing for temperature-compliant delivery acceptance.

With a net warehouse area of 200,000 sq ft with 22,000 pallet positions, CCN's DC is the largest frozen & chilled facility in Malaysia. The integrated warehouse, transport & accounting systems are fully integrated & are RFID capable. This provides the ability for online ordering and stock level management.

As a committee member in the Malaysian Halalan Toyyiban Pipeline Project, CCN was also the first food logistics company in the nation to be awarded both the Halal MS1500:2004 and MS1900:2005 accreditations. CCN was also the first in the industry to be awarded both the ISO9001:2000 and HACCP MS1480:2007 certifications.
